

ANATOMY (MD) {ANAT}

501. Human Anatomy: Head and Neck. (M) Drs Weisel & Teresi (Dir.), Staff. Prerequisite(s): Permission of instructor; open to graduate and professional students only.

This course in gross anatomy provides the student with an opportunity to acquire a first-hand knowledge of structural and functional human anatomy. The basic principle of learning is student dissection of the cadaver, supplemented by lectures, conferences, demonstrations, computer software, and independent study. The goals of the course are: to give the student a solid foundation of anatomical knowledge as a background for clinical education/practice or research; to prepare students for future, independent study of anatomy; to prepare students for the physical examination of the patient or research involving analysis of anatomical specimens; and to introduce new applications of gross anatomy for the physician and the biomedical student.

502. Gross Human Anatomy. (M) Drs Weisel & Teresi (Dir.), Staff. Prerequisite(s): Permission of instructor; open to graduate and professional students only.

This course in gross anatomy provides the student with an opportunity to acquire a first hand knowledge of structural and functional human anatomy.
