DIRECTIONS
Because there was no Gazette last month, our February puzzle celebrates not only President’s Day, but the January birthday of Penn’s founder. Here is a practice clue. Direct line not terminated by great inventor (8). Direct describes frank. Line not terminated is lin. (Breaking the answer into separate words like this makes it a charade.) Since a literal definition must appear at the beginning or end of every clue, great inventor is a specific reference to the answer—Franklin. Here are some hints to get you started on the puzzle. They say in 1-across signals a homophone or sound-alike. Returns in 7-down means a reversal. Secreted in 22-down indicates a hidden word clue. Broken in 9-across is an anagram indicator. The question mark in 3-across means that it is a pun. And 11-across, our tribute to Valentine’s Day, is a combination clue containing both an anagram and, as in every romance, a reversal.
